## Professional Summary

I am an aspiring web developer passionate about being in the field. I have learned languages such as JavaScript, HTML, CSS, Python, and SQL. While working hard to learn and achieve credentials I have learned to use different code editors such as Sublime and Atom and IDEs such as PyCharm and Visual Studios. I also worked with different packages and libraries like React and Angular to create responsive layouts. As the field continues to grow I have enjoyed keeping up-to-date and educated on the new technologies being used, especially GitHub copilot and Chat GPT. Each experience I garner leaves me excited and eager to learn more and I cannot wait to continue down this career path.

## Skills

- |              |         |                 |
|--------------|---------|-----------------|
| ❖ JavaScript | ❖ SCSS  | ❖ Java          |
| ❖ TypeScript | ❖ React | ❖ Springboot    |
| ❖ Python     | ❖ SQL   | ❖ MySQL         |
| ❖ HTML       | ❖ MERN  | ❖ Tableau       |
| ❖ CSS        | ❖ Figma | ❖ MS SQL Server |
|              | ❖ PHP   |                 |

## Certifications

- ❖ **React 18 for Beginners** ..... 2023
  - Code With Mosh created React course to further my knowledge of React and TypeScript. Went over technologies such as Vite and Chakra.
